

Luka store

Project Description

The project is an online cosmetics store in Egypt that aims to provide a wide range of beauty and personal care products at affordable prices while maintaining high quality. The store offers a mix of Egyptian, Turkish, and Indian cosmetic products, allowing customers to choose from different brands and product types according to their needs and preferences.

The business operates mainly through its e-commerce website and social media platforms, where customers can easily browse products, explore different brands, check the best-selling items, and place orders online in a simple and convenient way. The website is well organized, with products categorized by brands and sections such as Best Sellers, making the shopping experience easier for customers.

The store delivers orders across all governorates in Egypt through cooperation with Egypt Post, ensuring reliable and nationwide delivery coverage. The main goal of the project is to increase brand awareness and gain a larger share of the online cosmetics market in Egypt, especially as the online beauty market continues to grow.

The project focuses on building customer trust, providing good product variety, and offering competitive prices.

In terms of competition, the store faces direct competition from other small online cosmetics sellers, while the larger online competitors in the market include stores such as Be Mart Egypt and Cosmo Store Egypt.

Overall, the project aims to become a trusted destination for Egyptian girls looking for affordable beauty products, while also helping customers feel more confident and happy through accessible beauty solutions.
